## Introduction

The "Leadership in Financial Governance and Control" course is designed to empower professionals in the financial sector with the skills needed to lead effectively while maintaining rigorous financial governance and control. Over five days, participants will engage in interactive learning experiences that emphasize both the strategic and practical aspects of financial leadership. This course will equip you with the knowledge to implement robust financial controls, mitigate risks, and drive organizational success.

## Objectives

- Understand the principles of financial governance and its importance.
- Develop leadership skills specific to financial management and control.
- Learn to design and implement effective financial control systems.
- Gain insights into risk management and compliance within finance.
- Enhance strategic decision-making capabilities in financial leadership.
